DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to creation of a receptacle type, a folder, classified in class 279, subclass 67.1.
- II. Claims 9-16, drawn to use of databases for storing and accessing file information, classified in class 707, subclass 1.
- III. Claims 17-18, drawn to use of printed matter, the folder, used for advertising, classified in class 283, subclass 56.

2. The inventions are independent or distinct, each from the other because:

Inventions I, II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination for personalized presentation folders has separate utility such as a creating folders, storing data in database for file accessing, and use of advertising with printed matter. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art shown by their different classification, restriction for examination purposes as indicated is proper.

In addition, Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.
